6 HONOR ROLL OF DONORS JULY 1, 2001 TO JUNE 30, 2002

ON THE COVER

The windows of the Edwin C. Jahn Laboratory reflect a bright blue sky in this campus photo by Jeri Lynn Smith.

The State University of New York College of Environmental Science and Forestry offers a diverse range of accredited programs and degree options in chemistry, construction management and wood products engineering, environmental and forest biology, environmental resources and forest engineering, environmental studies, forest resources management, forest technology, landscape architecture, and paper science and engineering.

The College's mission is to be a world leader in instruction, research, and public service related to: understanding the structure and function of the world's ecosystems; developing, managing,

and using renewable natural resources; improving outdoor environments ranging from wilderness, to managed forests, to urban landscapes; and maintaining and enhancing biological diversity, environmental quality, and resource options. As such, ESF has maintained its unique status within 64-campus system as one of only five specialized colleges and one of only eight doctoral-granting institutions.

ESF takes affirmative action to provide equal opportunity for all people and to build a campus community that reflects a wealth of diversity.

Your Gifts Do Matter

by Christopher L. Westbrook, RS '73

The Ranger School has accomplished many things during the past 10 years that have helped preserve its status as the premiere forest technology program in the country. We have increased enrollment, developed and implemented an elective surveying concentration, and improved the forest technology curriculum. We began an assessment program to measure the effectiveness of our efforts and involved our faculty in professional development and community service activities. We also have completed a major capital construction project.

Without a doubt, none of these successes could have been accomplished without the significant financial support from our alumni, colleagues, friends and neighbors.

The outpouring of financial support for our small institution located on the northwestern edge of the Adirondack Park has been overwhelming, especially given our relatively small number of alumni — approximately 2,200 individuals.

In 1991 the Ranger School Endowment was started. The endowment was a new concept for the Ranger School, but it quickly gained support among our alumni. The fund has grown each year to its current level of approximately \$275,000. The endowment provides scholarships for our students, field and technical equipment for our classes, and supports faculty development.

Additionally, some of our alumni have created scholarship endowments. Frank Buholtz '47 presented us with a gift of land several years ago with the expectation that the land would be sold and the proceeds used to fund student scholarships. Sale of the property raised more than \$200,000 and represents the single largest gift received by the Ranger School. Mr. Buholtz, who died in 2001, requested that awards from the Buholtz Endowed Scholarship Fund be given in memory of C.E. Farnsworth, who was on the faculty at the Ranger School when he was a student. Daniel Cooke '55 has endowed an annual full-tuition scholarship for a deserving Ranger School student.

In August of this year, we launched a campaign to raise \$300,000 to help purchase furnishings and equipment to put the finishing touches on our \$6 million capital construction project. In five months we raised nearly \$100,000 in gifts and pledges — a remarkable show of support from our neighbors, friends and colleagues. Many gifts have come from non-alumni who have, in some unique way, been impacted by the Ranger School. A lot of our North Country neighbors have contributed in recognition of the services the Ranger School provides to the local community.

The Ranger School is only one of many programs at the College of Environmental Science and Forestry. Each one, like ours, has students who would not be able to attend college without scholarship assistance. Each has special needs — for class and field equipment, for the latest journals and other library resources, and for travel and other activities that support and supplement student learning experiences. Each has dedicated faculty members who benefit from research support and professional development activities, which in turn enhance their classroom teaching.

To those of you who provide support to ESF, I can tell you that your dollars do matter. It is your generous and continuous support that helps to make our programs successful. Thank you for your continued support of all of ESF's programs and a very special thanks to all who have supported the Ranger School.

Christopher L. Westbrook returned to the Ranger School in 1989 as professor and later was appointed director. He also directs the Summer Program in Field Forestry for the Faculty of Forest and Natural Resources Management. In 1996 he received the Chancellor's Award for Excellence in Teaching.

CAMPUS UPDATE

NBC show "Saturday Night Live"

Live from New York — It's ESF!

It's not unusual for the folks at ESF's Ranger School to receive "funny" phone calls from alumni, so when a caller identified himself as being with the NBC show Saturday Night Live, Kathie Nevil, program aide, was not about to take the bait. The caller assured her he wasn't joking and provided a number at which to call him back.

Jamie Savage, associate professor, called the alleged SNL representative back and found out it was the real deal. Prop Master Greg Tull was looking for items to establish a classroom setting for a sketch on the January 18 show. SNL found the college as a result of an Internet search for "forestry," said Savage.

A few more phone calls and an hour and a half later, Savage had a box full of maps, pine cones, leaf mounts, Ranger School mugs, a hard hat and maple syrup ready to go to New York City. Ranger School stickers were slapped on many of the items so the college's name would be visible on camera.

According to Savage, they had no idea what the skit was about except that it would take place in a classroom setting and involved trees. "When I was on the phone with Greg I could hear people in the background reworking the script," he said.

The props were used in a sketch titled, "The Falconer," the story of a society dropout living in the backwoods with a companion falcon. When the man is trapped under a fallen tree, he sends the falcon for help. The falcon goes to a college and instead of getting help ends up at a sorority party.

Not only did a number of the items sent get used (look carefully and you can see a Ranger School mug and a bottle of syrup), the college's name was worked into the skit when guest host Ray Liotta welcomes the falcon to "the College of Environmental Science and Forestry" and introduces himself as the "dean of log removal."

The nod from the award-winning comedy show caused quite a stir at the Ranger School and on the main campus. Christopher Westbrook, Ranger School director, said many people have contacted him to say they saw the skit including a Cranberry Lake summer resident and friend of the Ranger School in Alabama who sent the following e-mail:

"Dear Sir,

We watched your elegant performance on SNL. I had difficulty recognizing your office. I also wonder where that Sorority house is located."

"It was fun," said Westbrook. "It was just a fun thing to have happen."

ESF Receives High Marks from U.S. News & World Report

ESF was ranked among the nation's top universities in U.S. News & World Report's annual list of America's best colleges for the second year in a row.

ESF was ranked 36th on the list of the top 50 public national universities in the doctoral category, an improvement over last year's ranking of 39. The college was ranked 4th for universities having the highest proportion of classes with fewer than 20 students.

College president Cornelius B. Murphy, Jr. said he was pleased with the college's improved rankings. "It is a further affirmation that ESF is a leader in its field and a testament to the faculty and staff that ESF is rated so well," he said. Murphy cautioned that the rankings are only one indicator of the quality of the education provided by a college or university.

Here is how ESF fared in other categories:

- Among universities with the lowest acceptance rates, indicating a more selective admission process (ranked with Pennsylvania State University and Rutgers).
- ESF's graduation rate is the 29th highest among Public National Universities — Doctoral (along with Georgia Institute of Technology, Indiana University and Michigan State).

Overall ESF was ranked as a Tier 2 institution — the group just below the nation's top 50 universities. This category also includes the University of Minnesota, Ohio State, Michigan State, Virginia Tech and Texas A&M.

New Biotech Major Debuts

ESF students will have an opportunity to focus their studies on a new area next fall, when the college offers a major in biotechnology.

The college's approach to the subject will be unique because it will focus on the environment, unlike most biotech programs, which are geared toward medicine or agriculture, said ESF's Dr. William A. Powell.

"Biotechnology is defined as the use of organisms, cells or cellular molecules to

produce a service or product for the betterment of humankind," Powell said.

ESF already has an array of projects under way, including research in the area of phytoremediation (using plants to clean up pollution) and experiments in genetically altering American chestnut trees to make them resistant to the blight that has wiped out most of the trees across the country.

Although the new program will be administered by the Faculty of Environmental and Forest Biology, students will take an interdisciplinary approach to the subject, with classes including chemistry, and forest and natural resources management.

Powell, director of ESF's Council on Biotechnology in Forestry, said students eventually will have an opportunity to work in the new Central New York Biotechnology Research Center, which will be constructed in Syracuse with \$20 million in state funding. ESF has been designated as a lead academic partner with SUNY Upstate Medical University.

"That would be a great place for these students to do their internships," Powell said. "A big part of this program is going to be experiential. We will encourage internships and a research project in an ESF lab."

Alumnus' Gift Names New Lab in Baker

In the 1970s, ESF helped one wood products student develop the skills he would need in the business world. Three decades later, he's helping provide the tools for tomorrow's leaders.

Richard Ahearn, construction management and wood products engineering class of 1974, donated \$50,000 to name the Construction Method Lab in Baker Laboratory. The donation is the second largest gift the college has received toward the Baker rehabilitation project.

"The most important thing the college taught me was to think in a logical manner and solve the problems, be they technical or political, that crop up in day-to-day busi-

ness," said Ahearn.

As president of Ahearn Holtzman Construction in Port Chester, NY, he hopes to ensure the next generation of students has those same opportunities available. "The students need state-of-the-art equipment to give themselves the knowledge base they'll need when they get out into the business world."

While at ESF, Ahearn studied materials marketing, and after college began working in the construction side of the business. In 1984 he became president of Ahearn Holtzman Construction, whose client list includes the Central Park Zoo, Nextel, the New York Times, IBM and Bank of Boston.

"His generous donation will allow us to provide hands-on, high-tech educational experience for our construction management students," said Brenda Greenfield, assistant to the president.

New Leadership for Forestry Faculty

Dr. Chad P. Dawson has been appointed chair of the Faculty of Forest and Natural

Resources Management.

Dr. Donald W. Floyd has been appointed to the new position of associate chair.

Dawson, a resident of Mexico, N.Y., joined the ESF faculty in 1989. His work focuses on recreation resources management and wilderness management. He teaches courses on wilderness and river recreation management, psychology of leisure behavior, and commercial recreation.

Dawson received his bachelor's degree from the University of Michigan, his master's degree from Cornell University and his doctorate from ESF. He is a member of the

Society of American Foresters and associate editor of the International Journal of Wilderness.

Floyd, who has been on the faculty at ESF since 1993, is a specialist in the area of public policy in forest and natural resources management. He teaches courses in advanced natural resources and environmental policy.

Floyd earned his bachelor's degree from Humboldt State University, his master's degree from the University of Wisconsin and his doctorate from the University of Arizona. He was elected a fellow of the Society of American Foresters in 1999.

International Paper Endows Minority Scholarship Fund

A gift to the college from International Paper will bring new opportunities for talented minority students who pursue studies in forestry and related fields.

The minority scholarship fund, initiated by IP in 1998 as part of the company's 100th anniversary celebration, has grown to \$80,000 through annual gifts of \$20,000 over four years.

The company has expanded the terms of the gift to provide full tuition to a student studying in the Faculty of Forest and Natural Resources Management, Construction Management and Wood Products Engineering, or Environmental and Forest Biology. In addition, the scholarship will provide students with opportunities for summer internships with International Paper, as well as a chance to pursue employment with IP after graduation.

The gift is funded by International Paper's New York State Managers Council, which is made up of the managers of the company's facilities throughout New York. The members make contributions from their individual budgets. International Paper maintains about a dozen facilities in New York. Throughout the United States, the company employs hundreds of foresters to manage more than 10 million acres.

Chad Dawson

Honor Roll of Donors 2001-2002

ESF's honor roll of donors acknowledges all individuals and corporations who supported the college with a financial contribution during the period July 1, 2001, through June 30, 2002.

The honor roll recognizes contributions made to the ESF College Foundation, the Syracuse Pulp and Paper Foundation, the ESF Alumni Association and the Ranger School Alumni Association.

Contributors are listed in alphabetical order within various donor categories. These categories are: alumni, corporations, faculty and staff, foundations, friends, organizations, parents, and trustees and directors. Alumni additionally are listed by class year.

Within these broad groups, donors are further classified by giving level. These giving levels are:

Founder's Club	lifetime gifts of \$25,000 or more
President's Club	gifts of \$1,000 or more
Leader	gifts of \$500 to \$999
Pacesetter	gifts of \$250 to \$499
Centurion	gifts of \$100 to \$249
Pioneer	gifts of up to \$99

Employer matching gifts are not included in the total of an individual's gift. Employers are listed separately along with other corporate donors.

Individual gift totals are cumulative for the year if more than one gift was made, regardless of the purpose of the gift. For example, an alumnus who made a gift of \$250 to the Annual Fund and another gift of \$250 to the Syracuse Pulp and Paper Foundation would be listed once in the "Leader" category.

Alumni Association annual dues are not included in this honor roll. Dues are not considered by the Internal Revenue Service to be tax deductible, in contrast to gifts to the Annual Fund or other charitable programs.

We have made every effort to ensure this list is comprehensive and accurate. Any errors of omission or fact should be reported in writing or by telephone 315-470-6683.

Sarah Wiles: It Really Works

Sarah Wiles '83 has fond memories of her experiences at ESF's Cranberry Lake Biological Station.

After earning both her bachelor's degree and her Ph.D. from ESF, Wiles looked for a way to give something back to the college, and specifically to its satellite campus on the shore of idyllic Cranberry Lake.

Wiles was aware of the college's effort to make it easier for benefactors to make a donation to ESF, using the World Wide Web as a tool. "I thought, 'I'll just see if this online donating really works,'" she said. "I found out it does and it's really neat."

Wiles made the first such gift to the ESF College Foundation, Inc. The program allowed her to divide her gift as she chose: part to the general foundation fund, part to the bio station, part to an entrepreneurship program that will teach students how to use their academic success in the real world.

Her experience with her family's company, Mid-Lakes Navigation, prompted her interest in the entrepreneurship program.

"It's not because our business has anything to do with forestry, but because our family business started small and my father was a real-life entrepreneur," she said.

Anyone wishing to make an online gift to ESF can visit the development website at www.esf.edu/development/ and click on the "make a gift" button.

Allen Naples: A Great Opportunity

When Allen Naples looked for a program to be the recipient of a gift from his employer, ESF's Stalking Science Education in the Adirondacks was "the perfect fit."

HSBC Bank USA, which Naples serves as president of the Central/Capital Region, made a gift of \$13,500 to provide computer equipment, stipends to fund senior associate teachers, and design and printing of module booklets and fungi field guides.

"The bank has always been a very strong corporate citizen supporting as many of the not-for-profit organizations, both statewide and regionally, as we could," Naples said. "Stalking Science is a fantastic program."

Much of HSBC's generosity is directed toward organizations that are involved in education or the protection and improvement of the environment. Stalking Science does both. Operating under the wing of the Roosevelt Wild Life Station, the program takes science teachers into the Adirondacks for five days so they can use natural interpretation to enrich their teaching.

"It's just a great opportunity for HSBC to support this kind of effort," Naples said. "This is something I would look forward to supporting over the long term."

Sasha Blount: So Many Choices

As the end of her high school career approached, Sasha Blount faced a decision.

"I could pursue a career in the culinary arts or I could save the world," said the ESF freshman.

Luckily for ESF, a two-year stint as an intern with The Nature Conservancy in Manhattan and a favorite high school science teacher helped tip the balance for Blount toward a career in the environmental sciences.

Blount's contacts with admissions counselors, faculty, and students reinforced her positive image of the college. "They were wonderful. And, ESF is very well known and focused on so many environmental issues," she said.

A campus visit clinched her decision to come to ESF. "It was important for me to see that my mom was comfortable, too, because I'm an only child."

Scholarship assistance also was a key concern. "We're not the richest family—we're not the poorest. We're middle class." Without scholarships, Blount would have had to take out "lots of loans."

"The scholarships took a lot of stress off and allowed me to go to a good school at the same time," she said.

Blount's interests continue to be varied—she loves her environmental processes class with Professor Robert Malmesheimer but also is interested in environmental communications, policy and management, and environmental justice.

Wherever her final career choice leads, she says she'd like to stay in an urban area. "I want to work to correct problems 'close to home,'" she says, "problems I'm familiar with."

Charles Hall: Teaching Comes First

Charles A. Hall has garnered many accolades in his 30 years as a systems ecologist. But the honor he treasures most, he said, is the one he received from the ESF College Foundation, Inc.: the third annual Foundation Award for exceptional achievement in teaching.

"It means the most to me because for me teaching has always come first and because in my previous position at an Ivy League university I was told four times by my chairman that I 'spent too much time with my students,'" Hall told an audience of ESF colleagues the day he received the award.

Hall has been a member of the ESF Faculty of Environmental and Forest Biology since 1987. His spirited lectures and the passion he holds for his subject have made him a favorite with students.

The foundation's recognition award came with a \$1,000 grant to be used for professional purposes. Hall used it to pay for the taping of presentations in his Global Environment and the Evolution of Human Society courses. His goals are to continue raising funds for the project and get the material on the World Wide Web so high school students and other users can have access to the information.

"The award was essential to the project and it led to more funding," Hall said. "It was superb seed money."

Eric Greenfield: It's Why I Came To ESF

Time, said Eric J. Greenfield, is a precious commodity.

"The Farnsworth Fellowship has given me time: time to reflect, time to focus on my research," he said.

Without the fellowship, which he was selected to receive in the spring, Greenfield said, "I wouldn't be able to focus on my studies full time."

In addition to working on his dissertation, Greenfield is a visiting instructor at ESF and a member of several campus committees and organizations including the Ecological-Economics Group and the Society of American Foresters.

He is used to being busy. Before returning to graduate school, Greenfield served as a village trustee and as mayor of Delhi, N.Y. He also was executive director of the Coalition of Watershed Towns, and previously worked as an instructor at SUNY-Delhi.

After completing his doctorate, Greenfield plans to continue teaching on the college level. "It's why I came to ESF," he said. "A degree in forest and natural resources management is incredibly well-rounded in terms of problem solving and learning about resources. It's broadened my horizons and will help me be a better educator."

Leo Tidd: It's Made A Difference

Although sophomore Leo Tidd would like to attend law school, he's not sure what career path he'll eventually pursue.

"I'm trying to get as much as I can out of ESF and keep my options open," he said.

Several "really good" science teachers in high school helped turn Tidd on to a college major in the sciences. When he learned about ESF from a friend's mother, he said, "This is really cool, I'd like to do this very much."

So far, Tidd's experience at ESF has borne out that initial impression. "I've had some really, really good professors," he said. "They're into what they're doing and their enthusiasm absolutely captures the students' interest." One of his favorite classes so far is Nature and Popular Culture taught by Dr. Mark Meisner.

Tidd said he's been fortunate to receive two awards from the ESF College Foundation. This year, he qualified for a Foundation Award; last year he received the Hirsch Scholarship.

"It's made a huge difference to be able to go to school here," said Tidd, "especially last year in SU housing, every dollar helped."

Edward Audi: A Shining Star

A wood products lab in the renovated Hugh P. Baker Laboratory will bear the name of Stickley Furniture, thanks to a \$25,000 gift from the Central New York-based company.

Edward Audi, operations manager for the family-owned company, said Stickley employees often turn to ESF's wood products experts for advice on technical issues, particularly those involving the kiln-dried lumber the company uses to produce fine furniture.

"ESF is, in our opinion, a shining star in our own community and one that has been very helpful to us and to anyone who works with wood products," Audi said.

His family has owned the company, which was founded in 1900, since 1974. L.J.G. Stickley, Inc. employs 1,250 people at its plant in Manlius, N.Y., just a few miles from Syracuse.

"We hope this gift provides students with the most up-to-date tools they need," Audi said. "Baker has been due for renovation and we are delighted to see it happening."

think globally

Want to help provide a better environmental future and a better future environment for all the people of the world?

Contribute to the ESF Annual Fund.

ESF faculty and staff work to develop new knowledge that will help provide solutions to today's environmental issues.

Your support of the 2002-2003 Annual Fund makes an immediate impact on ESF students, faculty and staff, and has a far-reaching effect on our global environment.

THE FUTURE

Dr. Donald J. Leopold

Biodiversity

Dr. Donald J. Leopold's research takes him from forests to urban centers to wetlands and to scrub patches of land under utility poles. The ecologist wants to learn more about the many and varied species both locally and regionally, and the natural communities in which they occur.

"All species likely have a unique role," he said. "We just don't always know what it is."

Leopold points to recent discoveries about the Pacific yew hosting a specific anti-cancer compound. "Years ago it was cut down as a weed, now it is protected," Leopold said.

Preserving and promoting biodiversity are important on a host of levels, from species' benefits to society to the aesthetic — life is richer, more textured, more colorful.

"What controls patterns of biodiversity? Why are there many species in some places but so few in others?" he said. Similarly, some plants are rare over large areas, but are abundant in small patches.

Research suggests that the more species present the more resilient an ecosystem is, and the better able it is to recover after disturbance. Understanding the role biodiversity plays in making ecosystems resilient is key to helping restore areas damaged by humans.

"Most institutions study ecology for the sake of basic science, but doing so doesn't often increase species of concern, restore degraded habitats, or contribute to other activities that improve the world. At ESF, we seek ways to substantially enhance the environment and society."

With your gift to the ESF Annual Fund, you can make a difference on a global scale.
